

## Education Brain Sciences Research Laboratory

Laurie E. Cutting, Ph.D., Principal Investigator  
Vanderbilt University, Department of Special Education

### Reading Comprehension Study

Children ages 10-12 are invited to be part of a research study on the effects of text features, like genre, on reading comprehension.

#### The study includes:

- Initial eligibility screening
- Assessment of academic and cognitive skills
- Practice and real MRI exam of the brain
- Parent surveys of child development, learning, and behavior
- *Optional*: Child saliva sample collection

If you participate, you will receive:

- \$200 for testing, \$150 for each MRI scan, and \$50 in study completion bonuses (\$25 for testing & surveys, \$25 for MRI scan via e-gift card(s)).

***Complete the eligibility screening online:***
